Lars Jönsson, Developer

Experienced front-end developer with a strong track record of optimizing user interfaces and implementing new features across various projects, including the Swedish Association of Local Authorities and Regions (SKR). Skilled in Vue, React, Typescript, and Next.js, with proficiency in HTML/CSS, JavaScript, and MongoDB. Proven ability to integrate testing suites and contribute to Java back-end code. Adept at collaborating within teams and independently delivering high-quality work. Eager to bring my passion and dedication to a new front-end development opportunity. Learning C++ and Laravel development on my own.

Employment History

Front-end developer at Datastory, Stockholm

November 2022 — Present

I optimized the front-end user interface for improved UX/UI and developed new features in two of their own projects for the Swedish Association of Local Authorities and Regions (SKR), I've also implemented a new testing suite with Cypress and Jest in two of SKR:s project and integrated it to their pipeline. I assisted in cleaning up Java back-end code and ensured database stability to prevent issues.

The tech-stack for their projects includes .Net, Java, Vue, React.

I've also worked with Datastory's own SaaS product and that involved to implement new features based on a Figma design. They are using the Next.js framework,

Front-end developer Intern at Mujina AB, Stockholm

October 2021 — May 2022

I worked on the front-end part of a new PWA using tools like Next.js, TypeScript, Supabase, and Chakra-UI. I also contributed to a SASS project involving Next.js, GraphQL, Storybook, where I worked across the full stack but focused primarily on the front-end.

Education

.Net developer, Jönköpings Universitet, Värnamo

October 2020 — June 2022

I am learning to use modern JavaScript frameworks such as React in my case and to develop advanced web systems for ASP .NET and MVC.

Web developer, University College of Trollhättan/Uddevalla, Trollhättan

January 2017 — June 2018

A broad education where I learned HTML, CSS, JS, Angular, PHP, Wordpress and .NET

Gatsby

Typescript

Internships

Front-end developer at Mujina, Stockholm

November 2021 — January 2022

I worked with front-end development in the company's PWA (progressive web app) project. The tools I used were **Next.js**, **Chakra UI** and **Supabase**.

Front-end developer at Mujina, Stockholm

February 2022 — Present

Worked with front-end development in the company's SaaS project.

Basically the same tasks, but with other tools such as **GraphQL** and **Prisma**. Otherwise, we used **Next.js** and **Chakra UI**.

Hobbies

Weight training, rowing, fishing, play simulator games - X-plane 12 or MSFS2020. I'm a geek when it comes to airplanes in generell. I also love spending time with my kids. I also try to find some time to either learn a new programming language or keep working on one of my hobby projects.

Languages

 **Swedish** Native speaker

 **English** Good working knowledge
